Dear [redacted]:

Re: No Responsive Records – OUR FILE# NSHA-2022-182

On October 4, 2022, Nova Scotia Health (NSH) received your request under the *Freedom of Information and Protection of Privacy Act* (*FOIPOP Act*).

We understand your application to be for a copy of the following:

> **Record of all committees that have received and discussed the Pfizer safety data that has been released by way of order from a judge in the USA. Please include minutes, correspondence, concerns expressed etc.**
>
> **From January 1, 2022 to September 13, 2022.**

We have conducted a thorough search of our records, but we were not able to find any records responsive to your request. We are now closing your file.

Should you have any questions, please do not hesitate to contact me.

Dear [redacted]:

Re: No Responsive Records – OUR FILE# NSHA-2022-181

On October 14, 2022, Nova Scotia Health (NSH) received your request under the *Freedom of Information and Protection of Privacy Act* (*FOIPOP Act*).

We understand your application to be for a copy of the following:

- Blank AEFI form
- the number of forms filled out by doctors in NS for compensation for an AEFI
- how many were approved AEFI compensation forms
- how many were denied AEFI compensation forms

We have conducted a thorough search of our records, but we were not able to find any records responsive to your request.

- The Public Health Agency's AEFI form is posted online at their website: Report of adverse events following immunization (AEFI) (canada.ca)
- Nova Scotia Health does not have a record of the number of forms filled out by doctors in

In the last piece, it was shown how the Nova Scotia Premier's Office apparently had no records whatsoever concerning the "document dumping" that Pfizer was forced to undertake. Now, it seems like NS Health has no records to disclose either. One would think that the revelations in that paperwork would be cause for concern.

Nova Scotia doesn't have statistics available on the compensation of adverse reactions from the vaccine. However, there a small package for the AEFI reported thus far. There's also an attached link to the Federal program that is being administered through a 3rd party, RCGT Consulting Inc.

As of June 2022, there were:

- 615 non serious and 315 serious AEFI
- 57 cases of myocarditis/pericarditis
- 5 cases of Guillain-Barre Syndrome
- 2 cases of Vaccine-Induced Immune Thrombotic Thrombocytopenia

Keep in mind, this is just what has been reported. It's possible that there are far more side effects that have thus far gone under the radar.

As of the time of writing this:

- 774 claims have been submitted
- 7 claims have been approved
- 71 claims were deemed inadmissible for ineligibility and/or missing information
- 654 claims were deemed admissible
- 553 claims are in the process of collecting medical records
- 23 claims are being reviewed

From the FAQ section on their website:

> A ***serious and permanent injury is defined as*** a severe, life-threatening or life-altering injury that may require in-person hospitalization, or a prolongation of existing hospitalization, and results in persistent or significant disability or incapacity, or where the outcome is a congenital malformation or death

> The Vaccine Injury Support Program (VISP) is ***premised on the notion of no-fault. This means that financial support to eligible claimants is provided regardless of responsibility or possible fault*** (e.g., of the claimant, manufacturer or health professional administering the vaccine). A no-fault program ensures timely access to financial support.

> The ***amount of financial support an individual will receive will be determined on a case by case basis***. Amounts will be based on a pre-determined financial support payment framework. The framework will align with compensation provided under the Québec Vaccine Injury Compensation Program and informed by other public and private sector injury compensation practices.

It's interesting that all of this is premised as "no-fault" when there was outright coercion to get people to take the shots in the first place. There doesn't seem to be any posted rates of compensation.

One other point: accepting money from this program almost certainly means waiving any rights to take other actions (such as suing). True, there were indemnification agreements in

place, but this would protect *everyone* from liability, and can't really be challenged later. Expect non-disclosure agreements to be put in place as condition of getting any funds.

Also released is data on the total numbers of deaths in Nova Scotia, going back to 2017. In fairness, a small increase annually isn't farfetched, given the growing population. That said, the data shows small *decreases* from time to time, while 2021/2022 lists increases across the board. Look at it for yourself, and draw your own conclusions.

Remember: WHO defines a "Covid death" as: A probable or confirmed COVID-19 case whose death resulted from a clinically compatible illness, unless there is a clear alternative cause of death identified (e.g., trauma, poisoning, drug overdose). Sounds legitimate, right?

Now, this is unrelated to the above, but worth a browse. Here is the decision letter, and the results, of an FOIA request into weather modification. Remember when all of this was written off as conspiracy theories?

If you haven't checked out the work of Fluoride Free Peel, go do that. No proper isolation has ever been done, anywhere in the world. Arguing about "mitigation" or protective measures seems pointless if there's nothing to protect against.

Thank you, I found it. All this information is true and yet, millions of brainwashed imbeciles (including friends and family) repeat like parrots that these are ‘conspiracy theories’…

After all these warnings and efforts, you know what, let these morons die, they don’t worth the effort and the warnings.

Problem is that these cretins condemn us too by their blindness and stupidity.
